

GROW MY TREE

Plastic Certificate

Humanoo funded the collection of plastic waste as a gift for You

3 kg

Plastic pollution is one of the greatest environmental challenges of our time.

Collecting plastic cleans our oceans, rivers and land and thereby helps all life on earth and communities all around the world. Producing plastic is very CO2-intensive. As plastic degrades, harmful emissions are emitted. Collecting plastic does not only prevent this, but its recycling means that less new plastic needs to be produced.

By collecting plastic, you also support local villagers and fishermen in the Global South. Here, the ecological, social and economic impact of plastic collection is most significant: the environment is cleaned up while providing locals with a sustainable stream of impact. This way, sustainable development is promoted while combating climate change and protecting terrestrial and aquatic ecosystems.

This plastic certificate confirms your contribution to sustainable development through collecting plastic.
