I was also the President of student council in my last year of degree and the interactions with students and management was really nice and will go a long way with me in my life. # TMUC GOES TO L'ADRESSE, PARIS, FRANCE

One and only TMUC University for the Creative Arts, UCA & Higher National HN Fashion & Design department students in collaboration with L'ADRESSE Paris Agency completed a 10-day immersive fashion program in Paris, France, the fashion capital of the world.

Students were delighted to get the opportunity through TMUC for Experiential Trend Forecasting Summer Course. They visited the Founda, La Samaritaine, Louis Vuitton, Coco Chanel, Yves Saint Laurent and Hermes Atelier and attended private lectures by fashion industry experts. Their participation in this certification was an excellent initial stage of getting accustomed to the French Fashion Industry.

## ROMEELA JUNAID (UCA)

I will always remember this experience. It has inspired me to create and has given me so much exposure in so little time. This trip has truly uplifted me and I am so glad that I got this opportunity to learn through TMUC.

Paris is the fashion capital of the world, this was HUGE for a first year student like me. It has really opened up my eyes, given me clarity on trends in fashion and what the European world is looking for in fashion brands these days. I also found so many ways to promote Pakistani traditional handicrafts, fusing our culture within the European culture and creating something magnificent that can be worn by anyone globally, still containing a Pakistani flare to it, something that can be appreciated all over the world. This Paris Experiential Summer Course has really given me the power to be able to understand what kind of clothing the world needs right now.

## RANIA JUNAID (UCA-LEVEL 4)

The 10 days I spent in Paris for the Summer course on Trend Forecasting that was offered to us by L'Adresse was exactly what they said it would be; Experiential, and what a memorable experience it was indeed. We definitely got a ton of exposure on Trend Forecasting as every day we got to attend private visits or even some workshops at various locations, where we got to see for ourselves first hand different aspects related to Fashion whether it was discoveries and research done on Jewelry, or different visits, each focusing on things like Craftsmanship, Marketing, Communication, Journalism, and even the Technological advancements in Fashion etc. Overall getting to discover and learn new things, this was probably a once in a lifetime experience that I will definitely not forget. Not to mention probably none of this would be possible for me without TMUC as it was through Roots Millennium that I got to know of this course in the first place.
